

THE EASY AND AFFORDABLE GPS VEHICLE TRACKING SYSTEM

MONITOR USAGE & LOCATION

With GPS trailer tracking, quickly monitor how and where trailers are put into action using:

- Live updates on trailer location and continuous in-transit visibility
- Interactive route replay, including visual indicators for stops and other alerts
- Geofence alerts if your equipment is taken outside a specific geographic area
- Alerts for suspicious behavior and unauthorized use

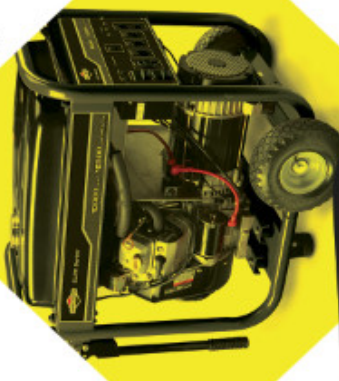

ACS GPS ASSET & EQUIPMENT TRACKERS

Are you looking to track and monitor truck trailers, construction equipment, rental equipment or other powered and non-powered types of equipment? Then GPS Asset Trackers are what you need. Our asset trackers:

- Come in a variety of form factors to meet your needs
 - Are rugged and weather-proof
 - Provide different tracking update intervals based on your need
 - Feature long-life batteries and even solar power options.
- ACS offers asset trackers that are water-proof and designed to fit on just about anything including:
- Powered and non-powered equipment
 - Truck trailers
 - Generators and compressors
 - Power packs and power units
 - Tanks and containers
 - Cargo units and much, much more
